### SECTION 11 – TOXICOLOGICAL INFORMATION

**Skin Contact** – Essentially non-irritating, LD50 absorption for skin is 2000 mg/kg. Prolonged or repeated contact with skin has been a cause of defatting or dermatitis in normal day to day handling of material.

**Eye Contact** – Essentially non-irritating, however, vapors and/or mists can cause mild to moderate irritation. Inhalation – Non-toxic LC50 = 5000ppm (rat inhalation). Can cause irritation to nose, throat and upper respiratory tract during prolonged exposure. Exercise caution if vapors are hot. If over exposure occurs – may cause dizziness, headaches or nausea. \*Based on toxicity of components.

**Ingestion** – Virtually Non-toxic LD 50 1400mg/kg (rat oral). Maybe harmful or fatal if swallowed. Can cause severe irritation of the mouth, throat and esophagus. Can cause nausea, vomiting or gastrointestinal upset. May cause diarrhea. Based on toxicity of Petroleum Distillate only.

**Carcinogenicity** – Non-carcinogenic as listed by: ACGIH, IARC MONOGRAPHS, or OSHA (based on toxicity reports of component parts)

### SECTION 12 – ECOLOGICAL INFORMATION

**Fish Bioassay Results:**

Not toxic to fish. All fish in the 100 mg/L concentration appeared and behaved normally during the test. The fish in the 500 mg/L concentration only showed rapid gill movement. Fish in the 600 to 1200 mg/L concentrations showed signs of stress, ie. moribund or loss of equilibrium.

### SECTION 13 – DISPOSAL CONSIDERATIONS

**WASTE DISPOSAL:** All disposal activities must comply with applicable laws and regulations. Empty containers may contain residue; do not weld, cut or grind. Empty containers can be cleaned with water and a high Ph soap (7-9). Recycle clean containers according to local regulations.
