

SCIENTIFICALLY PROTECT METAL

S2S PAINTABLE PRIMER IS A PRIMER THAT SCIENTIFICALLY PROTECTS METAL FROM RUST AND CORROSION

- Our proprietary solution penetrates rust, adheres to the base metal and virtually stops corrosion.
- S2S Paintable Primer is water-based, UL GreenGuard Gold certified and needs only basic pressure washing instead of sandblasting and grinding.
- Our technology was developed by a group of PHDs over a decade.

S2S PAINTABLE PRIMER

Using S2S Paintable Primer creates an extremely robust anti-corrosion solution that is safe for you, your people and the environment. S2S products work independently but also provide additional protective properties when used together for various industry needs.

OFFSHORE OIL RIG - Gulf of Mexico

Blasting/grinding was not an option for this location. S2S Paintable Primer allowed the applicators to protect the substrate by just power washing and de-greasing before applying S2S Paintable Primer. S2S Paintable Primer was applied as a topcoat after drying.

MSC CARGO SHIP - San Pedro, CA

Primary issue: Chloride induced pit corrosion exacerbated by collected salt water. Anticipated schedule with traditional prep and rust inhibitors: 5 men / 7 days. Actual schedule using S2S Paintable Primer: 1.5 men / 4 days.
